Contents of the Study

1. Introduction

It should contain the following parts:

Introduction, Problem, Hypotheses, Objectives, Importance.

2. Theoretical Framework – Literature Review

The theoretical framework or literature review should contain a presentation of previous studies and include a critical analysis of the literature and the construction of scientific arguments that highlight the research gap and lead to the formulation of the study hypotheses.

3. Practical Framework:

A- Study Methodology

Research methodology (*the method used and why*), research population and sample, research boundaries, research model.

B- Data Collection and Analysis Methods

The statistical methods used to analyze the data, hypothesis testing, results, recommendations, conclusion.

C- References

First: Arabic References

Second: Foreign References

Research Formatting

1. Paper

A4 size paper, with dimensions of (21 × 29) cm.

2. Number of Pages

The number of pages of the study should not exceed (30) pages, including the Arabic and English abstracts, figures and tables, and references.

3. Line Spacing

Single (1.5).

4. Fonts

The font type should be **Arabic Simplified**, font size **14**, and the numbering of tables and figures should be **12**.

5. Figures, Illustrations, and Tables

A- Charts and illustrative figures should be inserted in the text. Charts and figures should be in black and white and numbered sequentially. Their titles and explanatory notes should be written below them.

B- Tables should be inserted in the text and numbered sequentially. Their titles should be written above them, while explanatory notes should be written below the table.

6. Referencing

Referencing is done by citing the sources and references cited by the researcher in the body of the study, according to the publication manual of the **American Psychological Association (APA), Sixth Edition or the latest edition.**
